📄 Summary

Software Engineering graduate with hands-on experience in **business requirements gathering, workflow analysis, and system implementation** through my role as an **Odoo Implementer**. Skilled in translating client needs into functional specifications. Strong analytical foundation, communication skills, and technical understanding of web systems, enabling me to bridge the gap between business and technology.

🎓 Education

Bachelor of software engineering, *Jordan university of science and technology* ✉ 10/2022 – 01/2026
GPA: Excellent

💼 Professional Experience

Freelance Web Developer 2025 – Present

- Designed and developed **SharmaSheesh**, a responsive food-ordering web application using **MERN Stack**.
- Built full-stack features such as menu display, cart, order management, and OTP authentication.
- Collaborated with clients to define requirements and deliver functional, user-friendly solutions.
- Gained experience in deploying projects, optimizing UI/UX, and handling end-to-end development.

Odoo Implementer (Remote), *Smart Digit* 09/2023 – 05/2024

- Met with clients to explain and demonstrate Odoo ERP capabilities across multiple business domains.
- Collected and analyzed customer requirements to design tailored workflow solutions.
- Implemented and configured Odoo modules, customizing forms, views, and reports.
- Supported clients with testing, troubleshooting, and user training.
- Strengthened communication skills through requirement negotiation and follow-ups.

🧠 Skills

Soft Skills

- Problem Solving
- Analytical Thinking
- Teamwork
- Communication

Technical

- SQL (basics)
- APIs & JSON
- React / Node.js
- System Thinking

Business Analysis & Tools

- Requirements Gathering
- Workflow Mapping
- Use Cases & User Stories
- SRS Documentation
- Acceptance Criteria
- MS Office, Draw.io
- Postman
- Figma

Projects

Graduation Project – Event Management Web App

- Developed a full-stack web application for managing university events.
- Documented requirements, created user stories, and coordinated tasks among a team of 4.
- Implemented features including event creation, notifications, and user authentication.
- Tech: React, Node.js, MongoDB, Git
